Summary

I am a frontend engineer with a product-centric focus. I believe the web is still at the beginning, and I hope one day I will be part of building the Sistine Chapel of the web.

Experience

Flip   January 2023 - Present
Fullstack Engineer   Bucharest, Romania
- https://flip.ro/

- Successfully leading the migration from Nuxt JS to Next JS using a micro-frontends architecture
- Implemented a complete redesign of the shop's sell flow, resulting in a 23% increase in conversion rates
- Launched a new checkout experience in production bug-free using a strategy that would make it available only for tech team at first in order to be tested in production and only after that made it available for all the users

Seomonitor   November 2021 - December 2022
Frontend Engineer   Bucharest, Romania
- https://www.seomonitor.com/

- Developed new app sections to attract and engage potential customers
- Enhanced and optimized core functionalities within established SLA guidelines
- Implemented a UI component design system in Storybook, improving development efficiency

FintechOS   August 2020 - October 2021
Digital Developer   Bucharet, Romania
- https://fintechos.com/

- Implemented digital fintech solution for a retail banking company regarding SME's lending that improved the duration of the workflow from 2 weeks to a couple of days
- Implemented BNPL(buy now pay later) and SLICE IT payment methods for the biggest local retailer company
- Implemented digital fintech solution for a retail banking company regarding lending to companies with more than 5M EURO annual turnover that improved the duration of the workflow from 3 weeks to 1 week

Self-employed   September 2019 - July 2020
Freelance Web Developer   Bucharest, Romania

- Developed a full-stack web application called Zoomzet that focused on bringing all the news and events that happens around your location
- I've been part of the founding team of an AI HealthTech startup where I contributed by building the dashboard for the main product
- Developed websites from scratch and using Wordpress for foreign clients
- Worked on a side project that is a tool which takes a screenshot of a website, so you can track changes when they happen.

eJump   February 2016 - August 2019
Web Developer   Bucharest, Romania
- https://ejump.ro/

- Developed full-stack web application for an international dance competition
- Developed multi language websites with WordPress and Drupal
- Developed IoT web application and integration with Google Beacon Dashboard

Education

freeCodeCamp   January 2015 - January 2016
Web development   Online Community
- https://www.freecodecamp.org/

Academy Of Economic Studies   October 2011 - June 2015
Finance   Bachelor Degree
- https://ase.ro/

Gheorghe Munteanu Murgoci National College   September 2007 - June 2011
Mathematics - IT   High School
- https://www.cngmm.ro/

Projects

Random HTML Tags   2016
- https://www.producthunt.com/products/random-html-tags#random-html-tags

I launched a couple of side projects on Product Hunt and the most successful one was Random HTML Tags, a project that will literally help people to learn HTML in a fun and easy way: every time you refresh the page you get a random html tag with an explanation and how it can be used.

Volunteering

FRT   2012 - 2014
Volunteer   Bucharest, Romania
- http://www.frt.ro/ro/

- For three years in a row I was a volunteer at the Bucharest Tiriac Trophy Tennis Tournament
